Election/Restrictions

1. Applicant's election with traverse of claims 1-11 is acknowledged. The traversal is on the ground(s) that no serious burden is required to extend the search to groups II and III. This is not found persuasive because the art relied upon is non patent literature and requires a serious effort to search and retrieve. The requirement is still deemed proper and is therefore made FINAL.
2. This application contains claims 12-24 drawn to an invention nonelected with traverse. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-2 are rejected under 35 U.S.C. 102(a) as being anticipated by Gillespie,

Market Overview: Electronic Presentation and Payment.

The reference teaches the method of electronic Invoice Presentation and Payment, including EBPP (electronic bill presentment and payment) and EIPP (electronic invoice presentment and payment). While the reference is dated 28 November 2001, it nevertheless teaches that EPBB and EIPP (see, page 11) were in practice more than one year prior to the effective filing date of the instant application. The applicant takes official notice that the EBPP and EIPP read on the language of claims 1-2.

Art Unit: 3624

5. Claims 1-11 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Gillespie (of record).

The prior art teaches the method of EBPP and EIPP. The reference fails to expressly teach the limitations directed the software (e.g., delivery is automatic, written in HTML, written in Java Script, comprising less than 80 bytes, comprising a URL locator, comprising a encrypted URL).

This rejection is pursuant to case law which addresses the fact pattern where applicant claims a composition in terms of a function, property or characteristic and the composition of the prior art is the same as that of the claim but the function is not explicitly disclosed by the reference, the examiner may make a rejection under both 35 U.S.C. 102 and 103, expressed as a 102/103 rejection. "There is nothing inconsistent in concurrent rejections for obviousness under 35 U.S.C. 103 and for anticipation under 35 U.S.C. 102." *In re Best*, 562 F.2d 1252, 1255 n.4, 195 USPQ 430, 433 n.4 (CCPA 1977). The MPEP states that this same rationale should also apply to product, apparatus, and process claims claimed in terms of function, property or characteristic. Therefore, a 35 U.S.C. 102/103 rejection is appropriate for claims 1-11.
